

Toulouse, Oct 10-11th, 2018

Laurent Chec  
General Director  
Datadvance SAS  
[laurent.chec@datadvance.net](mailto:laurent.chec@datadvance.net)

### Roots of the Company

**Company roots goes to French aviation and Russian mathematics:**

- DATADVANCE has been incorporated in 2010 as a result of a collaborative research program by:
  - Airbus Group - a global leader in aerospace and defense industry
  - Institute for Information Transmission Problems - one of the leading mathematical centers in Russia with three Fields prize winners on the staff

### Worldwide presence with business partners

### New 2018 technology partners

### The world is changing: Industry 4.0

1st Mechanization, water power, steam power

2nd Mass production, assembly line, electricity

3rd Computer, industrial robots, automation

4th Cyber-physical systems Customization, build per-order

### pSeven capabilities

### R&D and algorithms improvement never ends

Never stop improving algorithms fostering model **QUALITY** and optimizer **EFFICIENCY**

**pSeven Beats MOPTA08 Automotive Benchmark**

pSeven significantly outperforms most of the results presented in the original publication with reduced number of evaluation required.

### Trends and company alignment

- Integration platforms all around (ERP, PLM, SDM, PIDO, IOT etc.). Harmonization is a dream. → **Open architecture**
- Predictive analytics, predictive maintenance → **Smart Models for complex behaviors**
- Collaborative Multidisciplinary strategies → **Nested workflow, batch execution, workflow by reference, cloud deployment**
- Model Based Systems Engineering (MBSE) and disciplines → **Most complex smart models export in neutral formats (FMI, C source, Excel etc.) and bridge to MBSE frameworks.**
- Centralized architecture. Web access for authors and runners → **pSeven Cloud deployment (on premises or public cloud). Service based architecture.**

### Main pSeven packages

**License policy:**

- pSeven Analytics - new product package
- Learn more at our website: <https://www.datadvance.net/product/licensing>

**Runner mode available:**

- Workflow execution only, with or without post processing.

**License files:**

- All customers with active maintenance will receive a new license file in order to update to pSeven 6.14

## Company roots goes to French aviation and Russian mathematics:

- DATADVANCE has been incorporated in 2010 as a result of a collaborative research program by:
  - **Airbus Group** – a global leader in aerospace and defense industry
  - **Institute for Information Transmission Problems** – one of the leading mathematical centers in Russia with three Fields prize winners on the staff

# Our customers

## Aerospace & Defense

## Automotive

## Energy, Process & Utilities

## Marine & Offshore

## Others

# Our team

- DATADVANCE locations:

- Headquarters are in the Netherlands
- R&D team of more than 40 highly skilled researchers and engineers (10 PhDs) is in Russia
- Sales offices are in France and Russia
- A network of resellers distributes Datadvance solution **Worldwide**

- Close collaboration with research labs:

- Skolkovo Institute of Technology
- Massachusetts Institute of Technology
- Institute of Information Transmission Problem of Russian Academy of Science
- Institute of Applied Mathematics of RAS
- Moscow Institute of Physics and Technology
- Saint Petersburg State Polytechnic University
- Bauman Moscow State Technical University

# Worldwide presence with business partners

# 2018 newcomers

## DAZZTECH

THERCAST FORGE REM3D COLDFORM

HERCAST FORGE REM3D COLDFORM

# The world is changing: Industry 4.0

1<sup>st</sup>

Mechanization, water power, steam power

2<sup>nd</sup>

Mass production, assembly line, electricity

3<sup>rd</sup>

Computer, industrial robots, automation

4<sup>th</sup>

Cyber-physical systems  
Customization, build per-order

# Smart Model

Machine Learning

Artificial Intelligence

Big Data

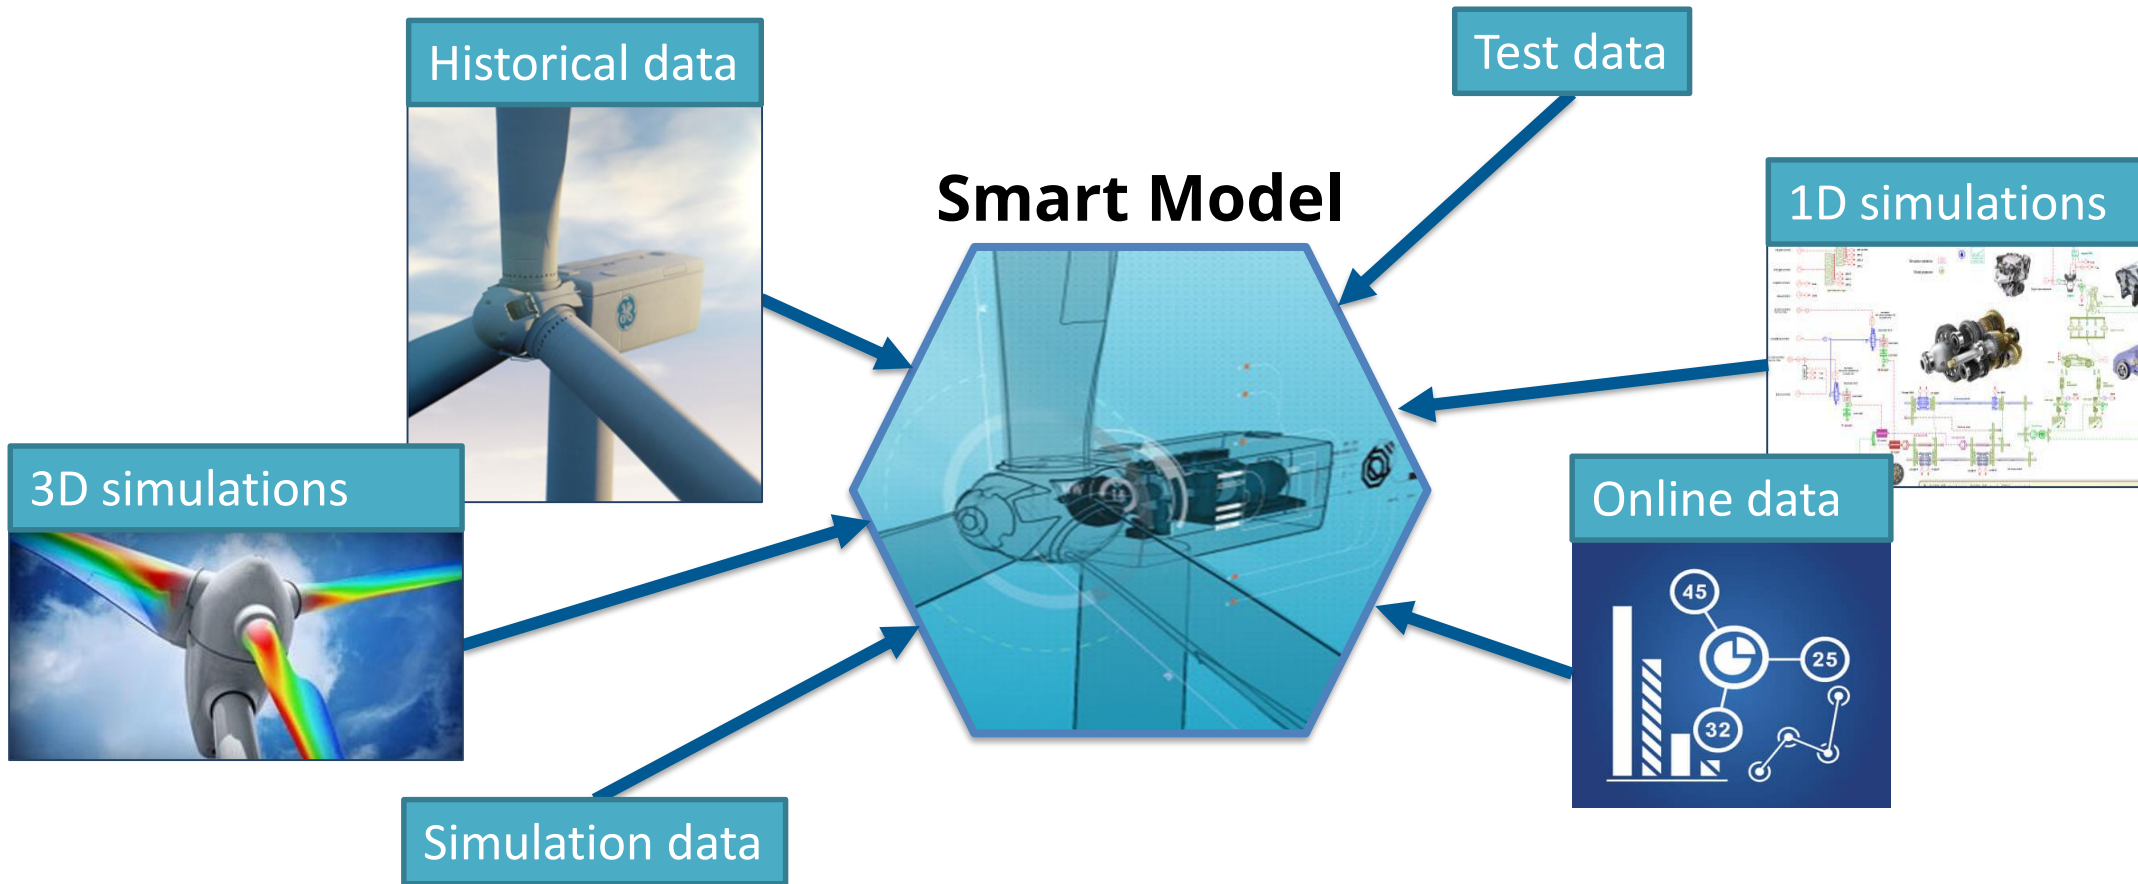

Analytics

Sensors

Digital Twin

MBSE

- Smart Model are the computerized clones of physical objects at various stages of product life cycle
- Smart Model use **simulation models** and **historical data** from sensors to represent real-time status, working condition or position
- Smart Model can be used for monitoring, diagnostics and prognostics

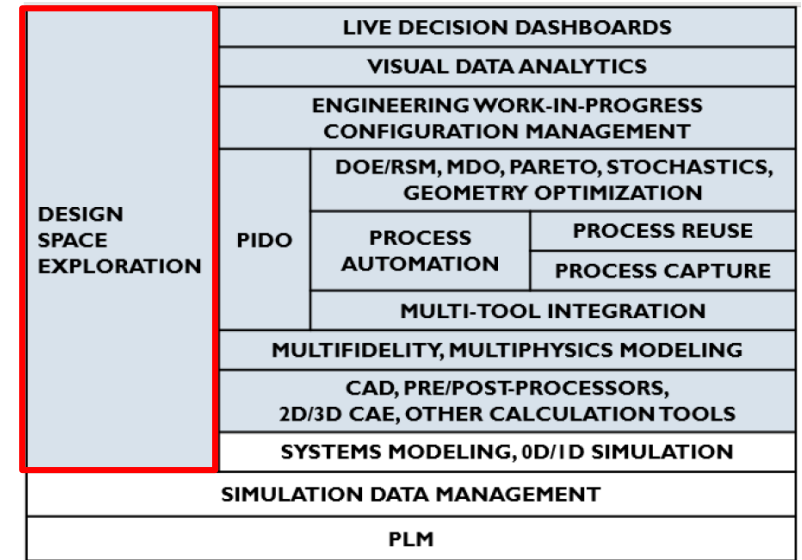

# Design Space Exploration in brief

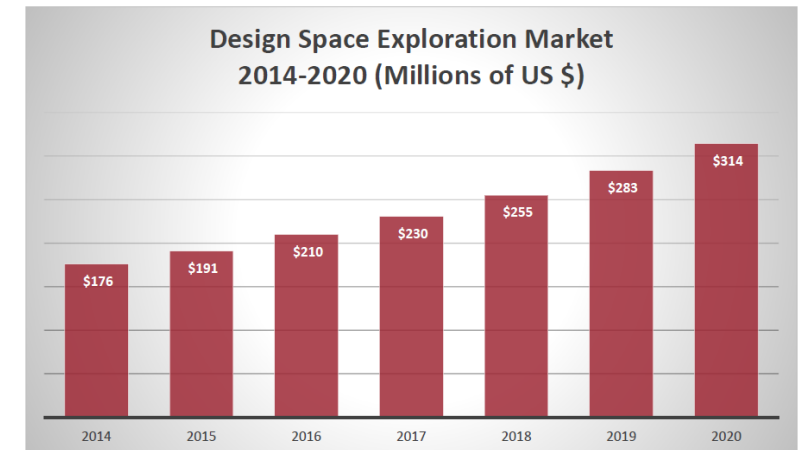

- **“Design Space Exploration** is both a class of methods and category of software tools for systematically and automatically exploring very large numbers of design alternatives and identifying those with optimal performance parameters”,  
- [B. Jenkins](#).

- With **Smart Models** one can perform design space exploration easily
  - Understand and develop trust in your model

- Mathematical methods:
  - Design of Experiments
  - Sensitivity and Dependency Analysis
  - Surrogate modelling and data analysis
  - Single and Multi-objective Optimization
  - Uncertainty Quantification
  - Robust and Reliability Based Design Optimization

Uncertainty Quantification

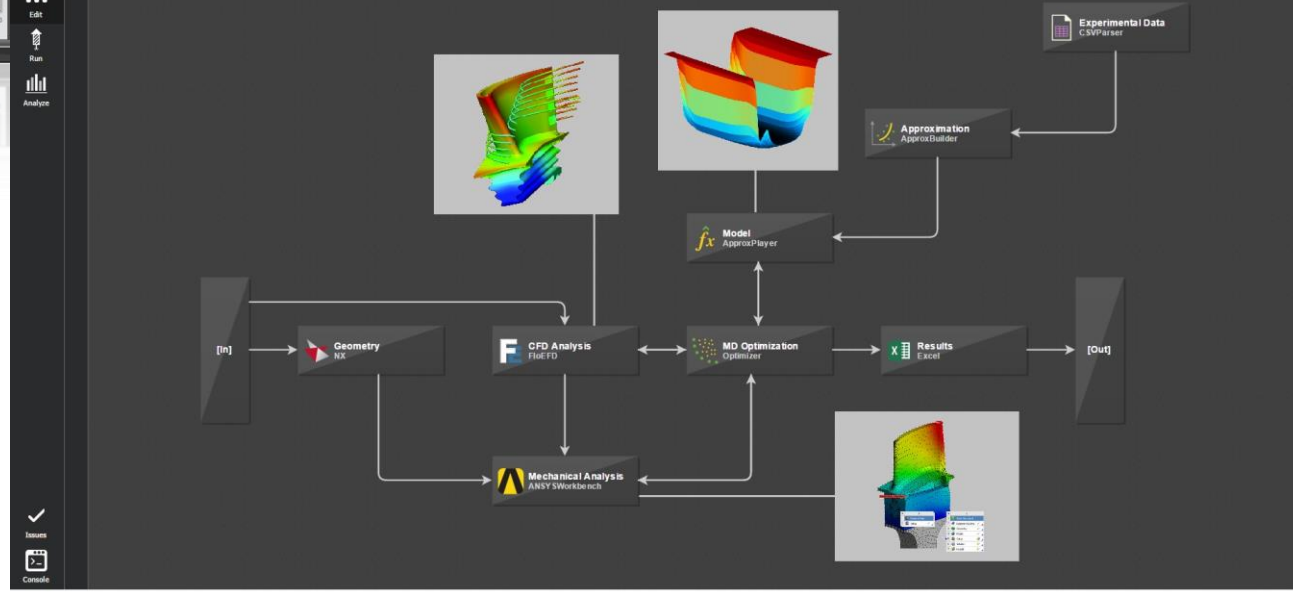

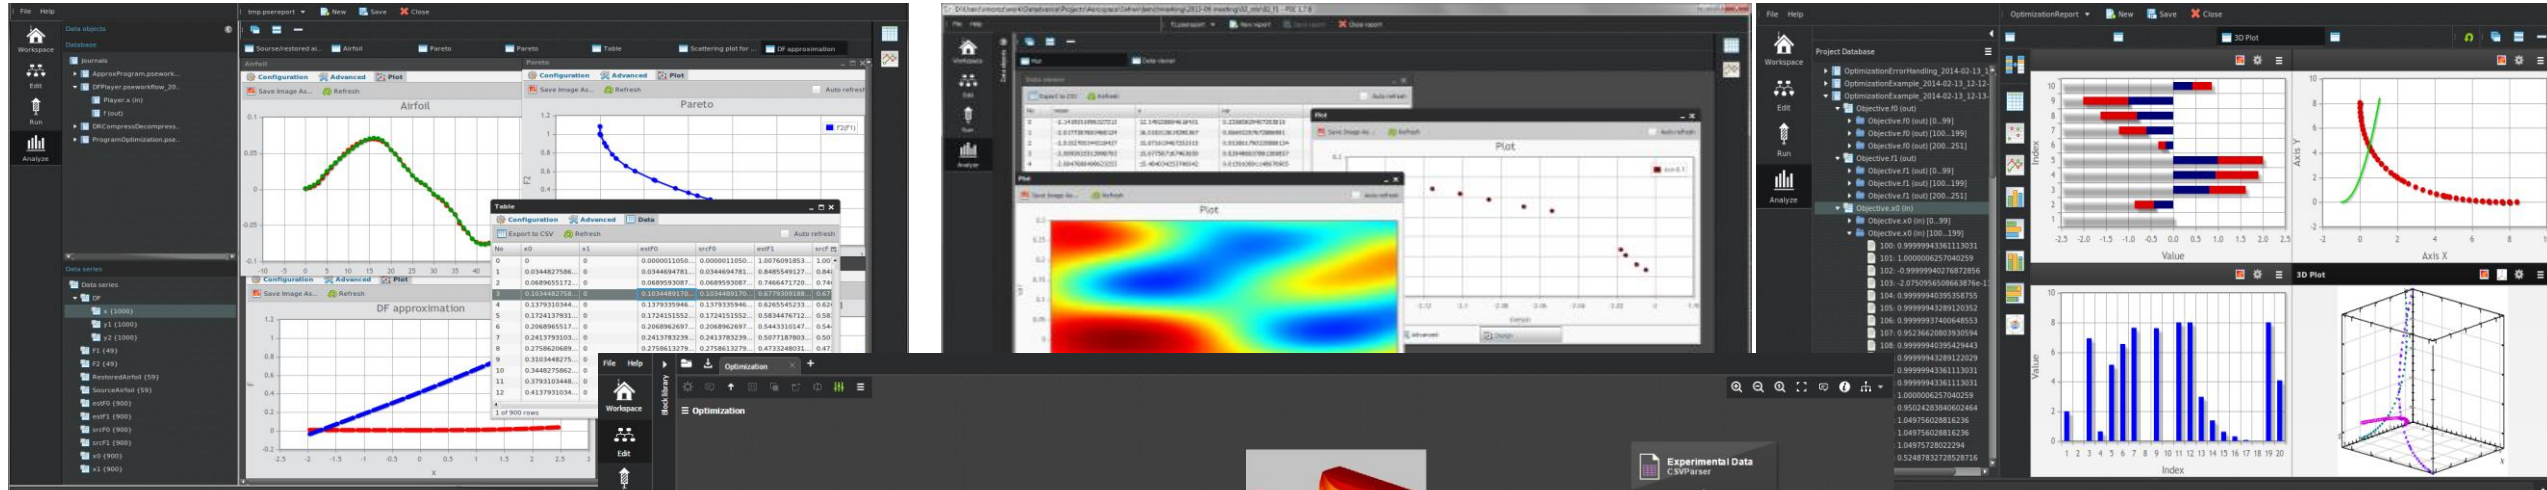

## pSeven Platform

# Enhanced user experience

**DATAADVANCE**

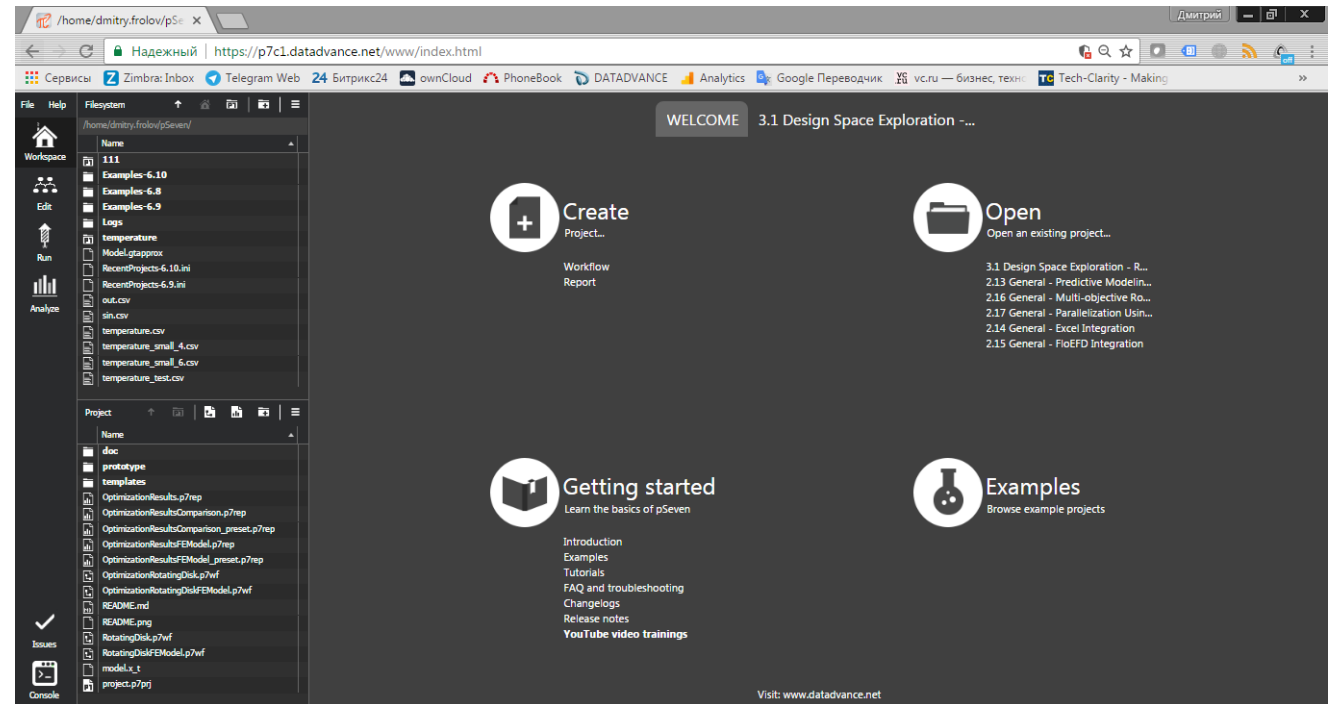

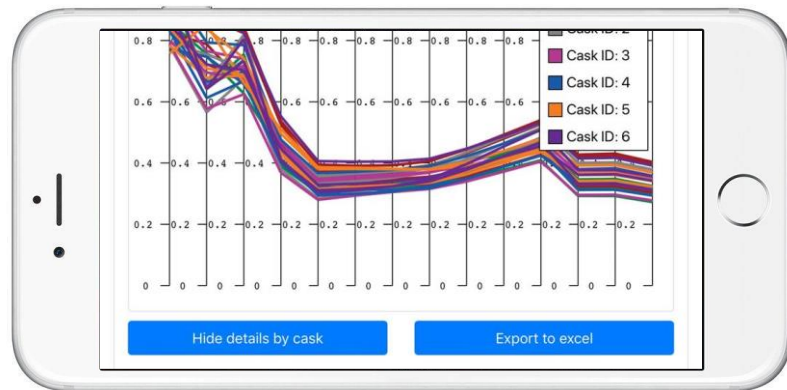

# Standardization and democratization

## pSeven platform architecture is web-based:

- Backend: Tornado server
- Frontend: Chromium (QtWebEngine)
- Seamless transition to full web solution in future releases

**pSeven Cloud** can be already run from browser

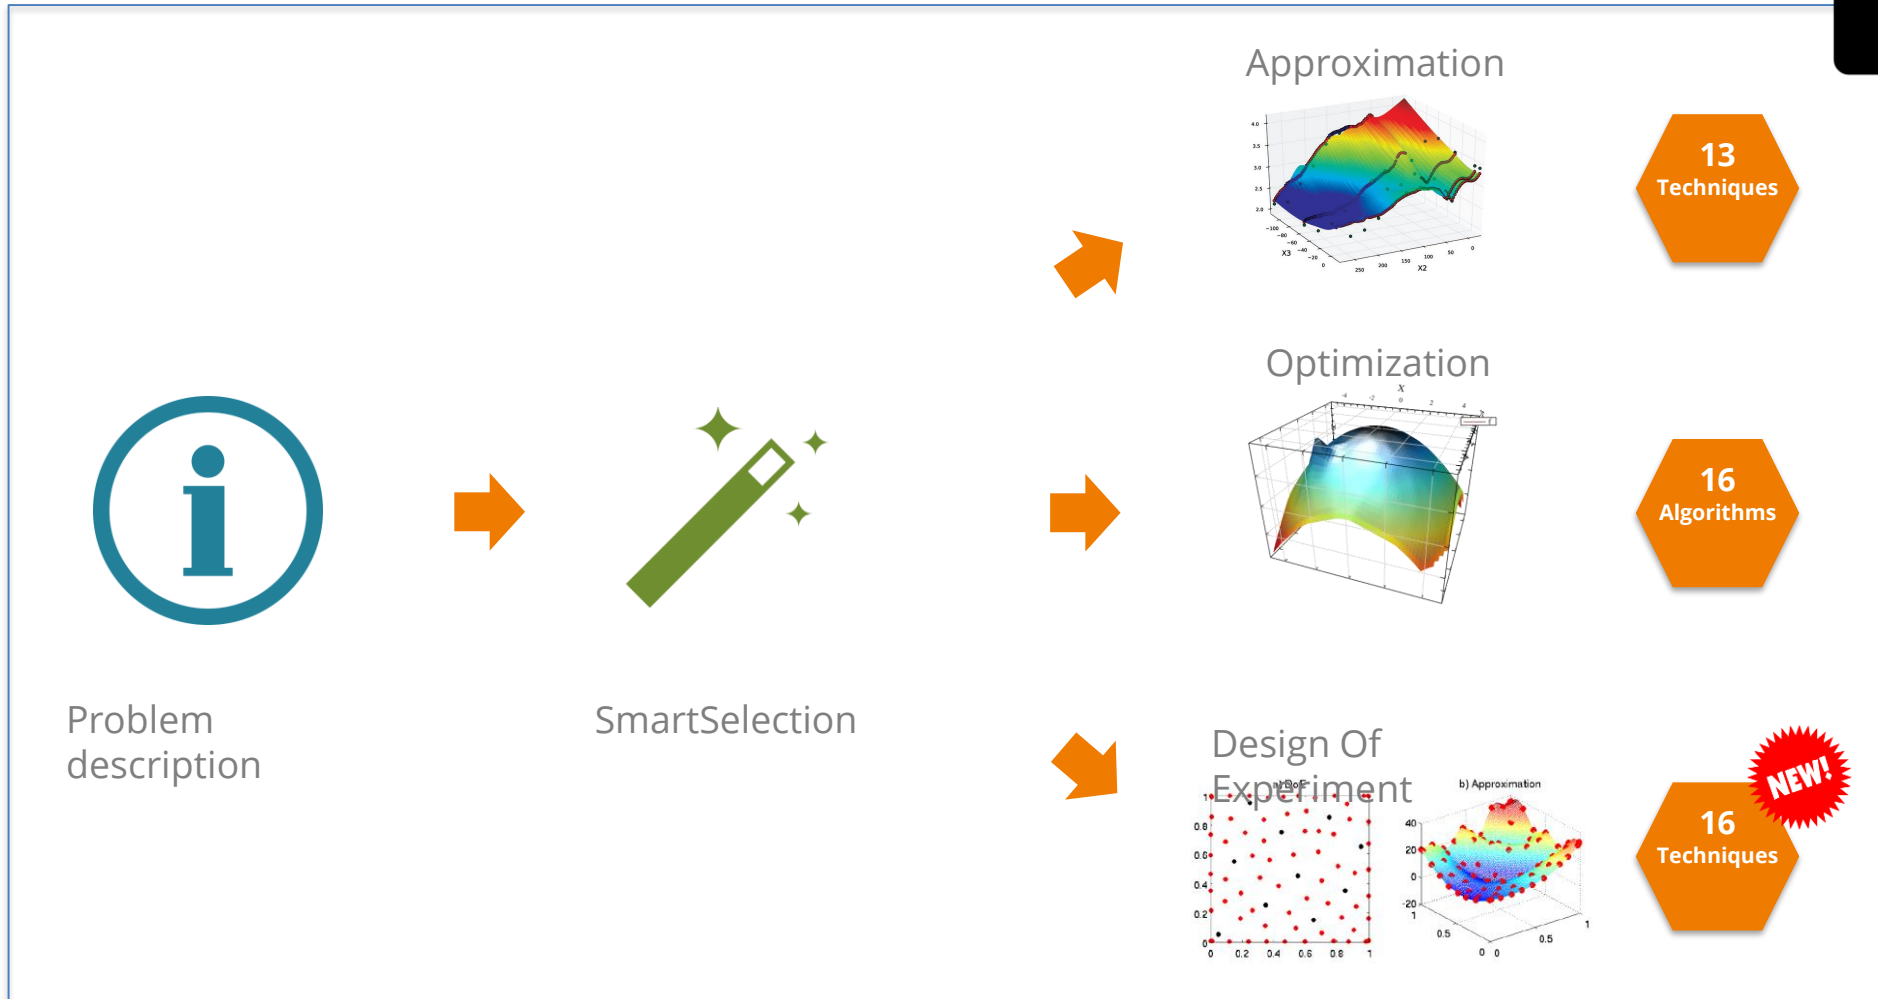

**Easy to add web customer layer**

pSeven Cloud in browser

# SmartSelection: Design Space Exploration for any engineer

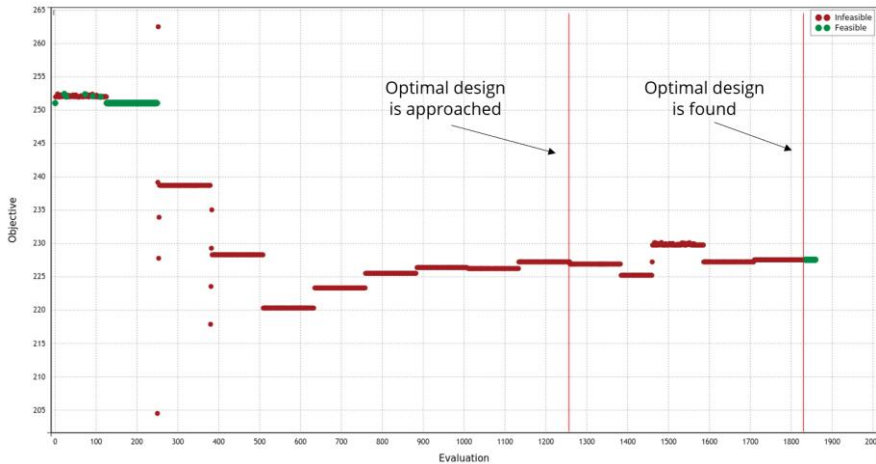

Leading edge technology made available to any engineer

## Never stop improving algorithms fostering model **QUALITY** and optimizer **EFFICIENCY**

### pSeven Beats MOPTA08 Automotive Benchmark

pSeven significantly outperforms most of the results presented in the original publication with reduced number of evaluation required.

Hinging / bending mode

Axial crush mode

# Trends and company alignment

Integration platforms all around (ERP, PLM, SDM, PIDO, IOT etc.). Harmonization is a dream.

Open architecture

REST API

GraphQL

python

JavaScript

Predictive analytics, predictive maintenance

Smart Models for complex behaviors

Collaborative Multidisciplinary strategies

Nested workflow, batch execution, workflow by reference, cloud deployment

Model Based Systems Engineering (MBSE) and disciplines

Most complex smart models export in neutral formats (FMI, C source, Excel etc.) and bridge to MBSE frameworks.

Centralized architecture. Web access for authors and runners

pSeven Cloud deployment (on premises or public cloud). Service based architecture.
